MOC SHIPYARDS PRIVATE LIMITED NEWSLETTER - **Sept 2023**

~DIRECTORS COMMUNIQUE~ OUR BHAG~

Several years ago the Board of Directors agreed that the aim of MOC Shipyards was to be well recognised as an International shipyard of choice.

This was referred to as our Big Hairy Audacious Goal or BHAG.

You, our team at MOC should be proud, this journey is becoming reality, together we will achieve our BHAG! Thank you.

WHAT'S ON THE HORIZON

Xelvona Shipyard

The Directors of MOC Shipyard are pleased to announce the purchase of a new industrial site in Xelvona on the banks of the Zuari River. The shipyard size is 24,000m² with a river frontage depth of 4.5m.

The first ship construction hall has been ordered with the following halls staged to meet production.

The construction halls have been designed at a height to allow the new 500 tonne travel lift to simply lift the vessels from the halls for launching via a purpose-built keyway. This is a first for India and will further validate our BHAG in becoming a world class yard.

A 3D render of this shipyard can be seen on the following page.

MOC Shipyards awarded contract to build a research vessel for Australian owners.

We are pleased to announce the signing of a contract with a well known and respected Australian company, the order will see construction of a VIP 25 meter research catamaran to be named SYMMETRY, she will commence construction in the new yard.

MOC Shipyards wins tender for construction of a specialised Landing Craft

Recently we were awarded a contract to construct a 39 meter waste collection landing craft for operation in the Maldives. This 39 meter small ship will have a beam of 11 meters and be the largest landing craft MOC have constructed to date.

MOC Shipyards nominated for award

MOC Shipyards Pvt. Ltd. has been nominated under India 5000 Best MSME Awards 2023 of India 5000 Awards

MOC Shipyards Xelvona Shipyard

Congratulations to all staff below for employee of the month

Manoj Yadav Emp. of the month Jan 22

Valancia Lucas Emp of the month Jan 23

Trinath Pradhan Emp. of the month Feb 22

Nizamuddin Khan Emp of the Month Feb 23

Antony Johnson Emp. of the month March 22

Forbin John Emp of the month March 23

Dharmendra Rao Emp. of the month April 22

Ratanesh Pandey Emp. of the month April 23

Edwin Fernandes Emp. of the month May 22

Trinath Pandi Emp. of the month May 23

Satheesan CA Emp. of the month June 22

Sai Anil Mhatre Emp of the month June 23

Sudip Mondal Emp. of the month July 22

Aaquib Ahmed Emp of the Month July 2023

Anil Kumar Emp. of the month Aug 22

Manjesh Tilyar Emp. of the month Sept 22

Chandra Prakash Emp of the month Oct 22

Joaquim Almeida Emp of the month Nov 22

Vaisahk PR Emp of the month Dec 22

Employee of the year is awarded to: Raju Yadav Emp. of the year 22

HAPPY BIRTHDAY

Nivedya Satheesh

On Tuesday 12th of September we had a very special guest in our shipyard.

Satheesh's youngest daughter celebrated her third birthday!

A very happy birthday to Nivedya Satheesh.

It was also wonderful to have mum Shima Satheesh and eldest daughter Nanadana in our yard for the cutting of the birthday cake.

New logo for MOC Shipyards

Our branding has been updated and will be used for the new shipyard, the new logo is a redesign of our existing logo with a more modern crisp picture incorporating a ramp bow representing our strong order book of landing craft.

Landing craft Pie Chanteuse launched and destined for a Seychelles Private Island

The recent launching of Pie Chanteuse has been welcomed by the Managing Director of Fregate Island, Mr Hilton Hastings has been in attendance during the sea trials and soon the vessel will undertake the delivery voyage down to Fregate Island.

Captain Marc Hoareau, the Seychelles Maritime Safety Authority flag state surveyor has conducted the survey for Pie Chanteuse and will also attend at the sailing of the ship.

Fregate Island and the name Pie Chanteuse

Pie Chanteuse is the Seychellois name for the “Seychelles Magpie Robin”. Fregate Island was the only remaining habitat of the almost extinct bird with a headcount of only fourteen, it was the second rarest bird in the world some 30 years ago. These charming, charismatic birds have since been restored to a healthy population by the permanent on-island conservation staff.

Safety Toolbox Talk

In this edition we will discuss **EYE PROTECTION**

Eye injuries are one of the most common workplace injuries. The good news is they are almost always preventable. To help you and your co-workers stay safe while at work, we have put together this eye safety toolbox talk.

REMEMBER IF YOU SEE A CO-WORKER NOT USING EYE PROTECTION IT IS YOUR DUTY TO REMIND THEM TO PUT SAFETY GLASSES ON.

In this toolbox talk, we will discuss the most common causes of eye injuries in the workplace and then go over how you can avoid them. By the end of this article, you should be fully aware of how to prevent eye injuries.

Why **MUST** we wear eye protection?

- ⇒ Prevent unnecessary eye injuries from occurring in the workplace
- ⇒ It is mandatory for all staff to adhere to safety regulations and standards
- ⇒ MOC Shipyards provide safety glasses to all staff
- ⇒ Fewer injuries = our BHAG to be recognised as an International shipyard

The Most Common Causes of Eye Injuries

Eye injuries can be caused by many hazards in the workplace and when carrying out dangerous jobs such as welding. Some of the most common hazards are:

- **Flying swarf and debris** – this can be caused by yourself or a co-worker grinding or working with equipment that omits swarf and debris.
- **Exposure to dangerous chemicals** – this is caused by chemicals and other dangerous substances becoming airborne and coming into contact with your eyes.
- **Blunt trauma to the eyes** – this can be caused by hazards such as falling objects or parts of machinery that stick out.
- **Heat exposure to the eyes** – this can be caused by getting too close to a co-worker welding or to machinery that emits hot air.

Safety Toolbox Talk

How to Avoid Eye Injuries

These are some great tips for avoiding eye injuries in the workplace:

- **Identify hazards** – before carrying out a task, make sure that you identify all of the potential hazards that could cause eye injuries. For every hazard that you identify, put in place safeguards to remove the risk. If you cannot eliminate major risks or are unsure, stop the job immediately and consult a supervisor.
- **Wear correct PPE** – always make sure that you wear the approved personal protection equipment (PPE) when carrying out a job where there is a potential risk of eye injuries. According to research, 3 out of 5 eye injuries are caused by people not wearing the correct PPE. Eye safety PPE includes safety glasses, face shields, and goggles. The exact type depends on the job you are doing. For example, when welding, you need to wear a welding face shield, and when grinding or using chemicals safety glasses must be worn as a minimum must be worn.
- **Protect your co-workers** – if carrying out a job such as welding, make sure that you put proper barriers up so that your co-workers can avoid UV exposure. If you are going to be carrying out a job where there might be a danger to your co-workers, make sure that you inform them before commencing the job.
- **Follow Emergency Procedures.** If something does, unfortunately, get into your eyes, don't rub or scratch your eye. If you do, rub or scratch your eye it can make the damage much worse. The correct procedure is to go to your nearest eyewash station or use a saline bottle to rinse your eye out and if necessary, seek medical treatment. If you wear contact lenses, remove them before rinsing your eyes out.

Summary

You only have ONE set of eyes, glass eyes may look okay but guess what, they don't see!

MOC is now on Facebook

Recently we launched our own Facebook page, please like and follow our page to receive updates.
